SKILLS

- HTML
- CSS
- Javascript
- React.JS
- Styled-Components
- React Hooks
- REST
- Restful
- HTTP
- Jest
- Node.JS
- Knex
- Typescript
- MySQL
- AWS
- SQL
- Github
- Firebase
- Unit testing

ABOUT ME

After working as an administrative assistant for several years, I realized that my true passion lay in web development. I began teaching myself coding in my free time and eventually I enrolled in a coding bootcamp and quickly proved to be a skilled and dedicated learner. I became proficient in HTML, CSS, JavaScript, and several programming languages, and honed mine skills in responsive web design, database management, and server-side programming. I credit my background in administration for giving me strong organizational skills and attention to detail, which I apply to my work as a developer.

EDUCATION

Labenu

FULL-STACK WEB DEVELOPMENT BOOTCAMP, AUGUST/2022 – FEBRUARY/2023

Program with over 1000 hours of hands-on experience in Full-stack development, guided by agile methodologies (Kanban/Scrum).
